

FOR YOUR PROTECTION, DO NOT USE IF INNER TAMPER EVIDENT SEAL IS BROKEN OR MISSING.

Keep out of reach of children. If you are under a doctor's care or taking medication, you should consult with your doctor before taking any supplement.

Preparation: Add enough non-chlorinated water to cover powder and quickly swirl vigorously to prevent sticking of powder to the bottle. Then add water to one inch above the top of the label and shake well for 20 seconds. Let sit on its side about an hour and reshake -- repeat as necessary (or let sit overnight) until all is in solution. Reshake and use.

Suggested use: Use as a daily supplement to support: Joint, GI, EYE, SKIN, IMMUNE SYSTEM AND SKELETAL HEALTH. First time users may double the daily dose for a week to replenish lost HA. Use within 90 days of preparation. The 50 oz size is intended for equine or multiple users (Humans and Pets) to ensure freshness and use within the optimal 90 days.

Dosage for Humans, Cats, Dogs & Equines:

Humans & large dogs -	2 teaspoons	(150 doses)
Medium dogs -	1.5 teaspoons	(200 doses)
Small dogs or cats -	.5 teaspoons	(600 doses)
Equine - (1 Ounce) -	6 teaspoons	(50 doses)

To maximize potency, product should be stored closed at room temperature and away from direct sunlight. May be refrigerated.

DIETARY SUPPLEMENT

PATENT FORMULA 10849923

HYALURONAN for joint and life support

Powder to Liquid Gel Formulation
(for optimum HA stability & effectiveness)

JUST ADD WATER

50 Fluid Ounces (1.5 Liters)
When Reconstituted

SUPPLEMENT FACTS

Serving Size: 2 Teaspoons (10 mL)
Servings Per Container: 150

Ingredients	Amount (per Serving)	% DV
Sodium Hyaluronan (sodium hyaluronate)	5 mg 100 mg	<2 *

Proprietary Blend 200 mg *

D-mannitol, sorbitol, cyclodextrin, colloidal silver.

*No Daily Value has been established.

Other ingredients: none.

****Our neutral pH (balanced) formula maintains and stabilizes the anti-inflammatory ability of the large Hyaluronan molecules.**

Competitor liquid HA products (prehydrated) contain water degraded molecules that are "inflammatory," a process accelerated by those products that have a low pH (usually containing citric acid, sodium benzoate and potassium sorbate). Solid dosage HA (capsules and tablets) are not easily dissolved or absorbed as HA must be in a "fresh" liquid form for full effectiveness.

Our solid-to-liquid formulation is the most stable form of HA and allows the consumer to prepare a fresh liquid when ready.
